INTEGRATED OUTCOMES.

NOT PART OF THE REGISTRY? SCOTTCARE STILL HAS YOUR OUTCOMES COVERED!

VersaCare's integrated and automatic Outcomes data lets you easily gauge patient progress. All required patient and detailed session information transfer automatically from the monitoring program to Outcomes—without data re-entry or import/export!

- Single Patient Outcomes:** Illustrate a patient's start-to-finish progress; track clinical resting and exercise data; collect and compare behavioral and health data for six and 12-month follow-ups.
- Program Outcomes:** Gauge trends and overall program performance including Statistical (Administrative) Analysis, Physiological & Behavioral Analysis and Certification reports; filter patient populations by any or all data resource fields; user-defined sorting includes Risk Factors, Diagnoses, Medications, Referring Physicians, Insurance, Program Participation/Compliance and more.
- Quality of Life:** Track and document patient improvement with integrated Quality of Life surveys including SF12*, SF36V2* and Ferrans & Powers (cardiac and pulmonary versions), as well as the extensive Diet Habit and Rate Your Plate surveys.

VersaCare also supports emerging requirements including patient registry inputs, Pay for Performance quality measures and third-party outcomes.

Always here for you.

Let VersaCare's friendly technology transform your team's expertise into the most effective patient care yet.

No other telemetry system adapts to differing work styles and reduces repetition so effectively.

VersaCare simplifies the process of patient monitoring and easily but securely lets you access, organize and report on the data - internally and to third parties - regarding your patients' benchmarks and outcomes. And we back it with friendly, experienced implementation professionals and support who know your team and are dedicated to the success of you and your patients.

Customize your system to your heart's content! See just the data you want to see, the way you want to see it.

You have the ability to customize drop-down menus or input screens; highlight high-risk patients with reverse ECG/background colors; define which on-screen telemetry channels and patient information appear; and so much more!

ScottCare systems have been trusted by our customers to conduct more than 14 million patient sessions.

And no user or session was alike, a reality we take to heart. That's why we ensure that each new version of VersaCare continues to accommodate your unique way of interacting with the system and organizing data, making it easy to tailor monitoring to individual patient needs, resulting in more effective patient outcomes.

System above includes standard monitor, speakers, keyboard, mouse, File Manager, Receiver, four INNOVOs and an HP laser printer. Your system may vary.

DIGITAL TRANSMITTER

Rechargeable INNOVO, designed specifically for exercise, provides waveform stabilization for cleaner, more accurate tracings and easier event identification.

JUST ONCE & DONE

Enter patient data in any form: it automatically populates all other related forms, including ITPs, ScottCare Outcomes and AACVPR Registries.

CUSTOMER SUPPORT

Highly skilled and qualified Implementation, Clinical Application and Technical Service Teams are available to ensure success with your ScottCare product.

VALUABLE ADD-ONS

NETWORK WORKSTATIONS & SITES

- Network workstations—even at different locations—while sharing the same patient database, so you can monitor, manage or report right from where you are.
- Network facilities into one EHR database through our Enterprise Integration Solution™; save time and expense while meeting all Rehab and IT requirements.

SPEND MORE TIME WITH PATIENTS

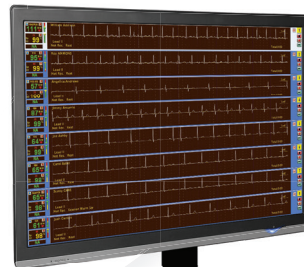

- Simultaneously view up to 48 cardiac and pulmonary channels of monitored and unmonitored patients per workstation. View up to 16 telemetry channels.
- Add telemetry channels one at a time and start, stop, pause or advance all channels at once.

GO PAPERLESS

- VersaCare is packed with pre-built ITP templates and reports, including pulmonary-specific, session trending, heart rate and SpO2.
- Immediately use pre-built templates, edit them on-the-fly or create your own, all within the system.
- VersaCare integrates with both the AACVPR Cardiac and Pulmonary registries and supports Intensive Cardiac Rehab (ICR) outcomes and reporting.
- Access and edit all session reports for monitored and unmonitored patients— VersaCare permanently retains each full disclosure of every session.

See Data in the Way That's Convenient to YOU.

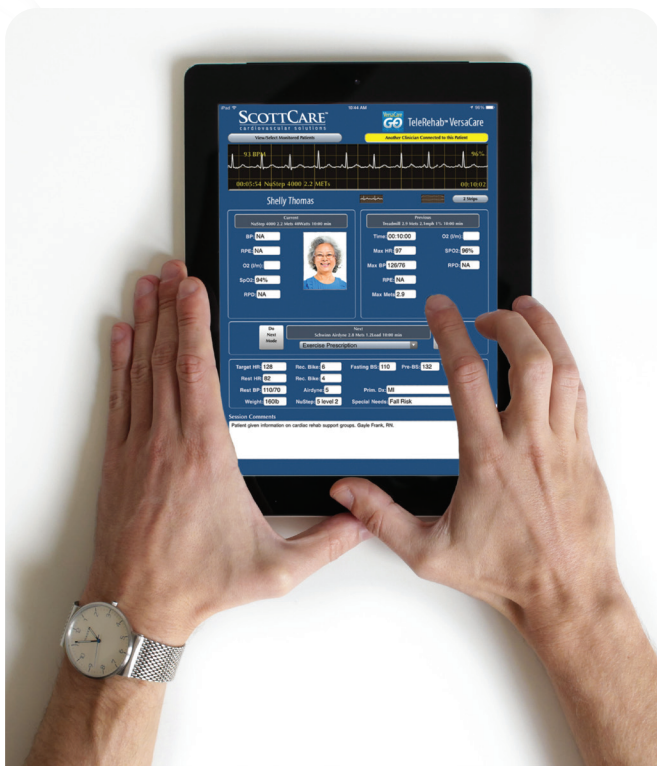

Configure your workstations in a way that makes the most sense for your team with 1, 2 or even 3 monitors.

"We have a 24-channel VersaCare system with four VersaCare GO iPads and four laptops. It's a complex system and ScottCare has provided consistently excellent service—from sales, to installation and training, to technical support. Thank you!"

Debbie
Rehab Director
Cookeville, TN

Mobility.
What a
Difference!

With **VersaCare GO**, you can monitor from the floor while with your patient instead of being chained to a workstation. So GO!

In business since 1989, ScottCare provides devices, software, EHR data integration and clinical monitoring labor solutions to aid hospitals and cardiology practices in the diagnosis and management of cardiovascular disease.

ScottCare is a division of Scott Fetzer, a diversified manufacturer and marketer of high quality products for the home, family and industry comprising more than 20 businesses.

You can count on ScottCare today and well into the future to make the difference in the care and outcomes of your patients.
